Who We Are

A DIGITAL CONSULTANCY

A&F Ventures is a digital consultancy helping Micro, Small, and Medium Enterprises modernize and grow through AI-powered digital infrastructure, automation, and modern web technologies.

Founded by **Avi Dharani** and **Fadeel Notta**, A&F Ventures was built on a simple observation: most businesses today are stuck with either no digital presence at all, or low-quality websites that fail to grow with them. We exist to close that gap.

Our work blends global-quality engineering with deep local understanding. We design and build websites that look beautiful, perform fast, and actually drive results — and we don't disappear after launch. Every client we partner with gets ongoing support, continued improvement, and a long-term digital partner invested in their growth.

Headquartered in Kenya and ready to work with clients globally, we combine the speed and intelligence of modern AI tools with hands-on craftsmanship — delivering solutions that would normally cost ten times what we charge.

Mission & Vision

WHERE WE'RE GOING

Two ideas anchor everything we do — what we exist to achieve today, and the future we're building toward tomorrow.

Mission

To empower Micro, Small, and Medium Enterprises with affordable, high-quality digital infrastructure — websites, automation, and custom AI solutions — that allow them to compete at a global level without enterprise-sized budgets.

Vision

To become the most trusted digital partner for ambitious businesses across Africa and beyond — known not just for building great products, but for building lasting relationships that grow with our clients over time.

What Drives Us

Every business deserves great technology. Yet most small businesses are stuck choosing between cheap templates that look unprofessional, or agencies that charge prices that don't make sense for their stage. A&F Ventures is the third option — affordable pricing, premium quality, modern AI tooling, and a real partner who stays with you after the launch.

Our Values

THE WAY WE WORK

These aren't just words on a page. They're the principles that decide how we quote a project, talk to a client, and write a single line of code.

I.

Quality Without Compromise

Every site we ship is custom-built — frontend and backend. No templates dressed up to look custom. Quality is the standard, not a feature.

II.

Partnership Over Transaction

We don't sell websites; we partner with businesses. Our retainer model exists because real growth requires ongoing support.

III.

Speed With Substance

AI-powered workflows let us move fast — but never at the cost of doing the work properly. Quick delivery, no shortcuts.

IV.

Honesty Always

Clear pricing. Clear timelines. Clear conversations. If something won't work, we say so. If we don't know, we say that too.

V.

Global Quality, Local Heart

We deliver work that meets international standards while staying rooted in the realities of the markets we serve.

VI.

Always Building Forward

We use modern web technologies and AI to deliver tomorrow's solutions today — not yesterday's tools wrapped in new branding.

What We Do

SERVICES & CAPABILITIES

From your first website to a fully automated, AI-powered digital operation — we deliver across the full stack of modern business needs.

01 Custom Website Development

Modern, fast, fully responsive websites built from scratch — frontend and backend. No templates. No drag-and-drop builders. Sites that look professional, load fast, and grow with your business.

02 Full Digital Infrastructure

Domain registration, hosting setup, professional email, integrations, analytics — the complete digital foundation so you can focus on running your business while we handle the tech.

03 Business Automation

Online ordering systems, booking flows, WhatsApp and email automation, internal workflow tools. We replace manual repetitive tasks with systems that quietly run your business in the background.

04 Custom AI Solutions

AI chatbots for customer service, intelligent content tools, AI-assisted operations. Tailored AI integrations built specifically for how your business actually works.

05 Ongoing Support & Growth

Monthly retainers covering maintenance, performance monitoring, updates, and continued improvements. Your site doesn't stay static — it evolves with your business.

Why Choose A&F

WHAT SETS US APART

There's no shortage of web developers in the market. Here's why our clients choose us — and stay with us.

◆ **AI-Powered Builds**

Modern web technologies combined with AI tooling throughout our build process means smarter websites, faster delivery, and capabilities that traditional developers simply don't offer.

◆ **Built for Real Business Budgets**

Our pricing is designed for ambitious businesses that need premium quality without enterprise-level invoices. You get exceptional value, not compromise.

◆ **Fast, Focused Delivery**

We don't drag projects out for months. From kickoff to launch, we move with focus — and you see meaningful progress along the way.

◆ **Truly Custom Work**

Every project is custom-built — full frontend and backend. Not a recolored template, not a no-code shortcut. Code that's yours, made for your business.

◆ **Ongoing Partnership**

Most agencies disappear at launch. We don't. Our monthly retainers keep us in your corner — maintaining, improving, and growing alongside you.

◆ **Global Quality, Local Understanding**

We deliver work that matches international standards, while genuinely understanding the markets, customers, and constraints our clients operate in.

Meet the Founders

THE A & THE F

A&F Ventures was founded by two builders who share a single conviction: that smart businesses deserve smart technology — and that great work doesn't have to come with a great markup.

Avi Dharani

CO-FOUNDER

Co-founder of A&F Ventures. Avi leads on client strategy, product design, and the engineering side of our builds — translating real business problems into thoughtful digital solutions.

Fadeel Notta

CO-FOUNDER

Co-founder of A&F Ventures. Fadeel focuses on partnerships, growth, and delivery — making sure every client engagement runs smoothly from first conversation to long after launch.

A Shared Philosophy

Avi and Fadeel started A&F Ventures because they saw too many businesses being underserved by their digital partners. Too expensive at one end, too low-quality at the other, with no one filling the middle. A&F Ventures is what they built to fill it — a consultancy run by builders, for builders.

Our Work

CLIENTS & TRACK RECORD

FEATURED CLIENT

Qaffee Point

"Everyone's Living Room" — a beloved hospitality brand and one of A&F Ventures' first partners. We worked closely with the team to build a digital presence that reflects the warmth, quality, and personality that defines them in person.

Engagement: Custom website development, digital infrastructure, ongoing support retainer.

An Active Pipeline

Beyond Qaffee Point, A&F Ventures is in active conversations with multiple organizations — including the **Masai Group** and other businesses preparing to modernize their digital operations. What started as an idea is now a growing portfolio of partners who trust us to build their next chapter.
