Crafting the Future of Business.

DIGITAL SOLUTION REPORT

Prepared For

Il Giardino, Koroga & Group Restaurants

Prepared By

A&F Ventures – Digital Growth Consultancy

Main Problem Being Faced

Each of the three restaurants operates with a strong dining reputation but lacks a unified digital infrastructure. Reservations, ordering, payments, and customer retention are all handled manually — through phone calls, walk-ins, and untracked M-Pesa transactions. There is no centralized system to capture customer data, manage loyalty, or convert online interest into confirmed bookings and orders.

This fragmented setup limits scalability, slows operations, and leaves significant revenue and customer lifetime value on the table — especially as modern diners expect seamless online menus, instant table booking, integrated mobile payments, and rewards for loyalty.

A&F Solution

A complete digital platform for each restaurant — a custom website paired with a powerful backend system that handles reservations, online ordering, M-Pesa payments, loyalty rewards, and full operational analytics. Each restaurant gets its own branded platform, fully owned and managed centrally.

Website & System Structure (Front-End)

- Page 1 – Landing / Hero Section with cinematic visuals and clear CTAs
- Page 2 – Digital Menu & Online Ordering (with M-Pesa checkout)
- Page 3 – Table Reservations with real-time availability
- Page 4 – Rewards & Loyalty Program portal
- Page 5 – About Us & brand storytelling
- Page 6 – Gallery & Contact

Backend System Architecture

- System 1 – Reservation Management Engine
- System 2 – Online Ordering Engine
- System 3 – M-Pesa Daraja API Integration
- System 4 – Rewards & Loyalty Engine
- System 5 – Customer Database (CRM)
- System 6 – Admin Dashboard (Internal Control Panel)
- System 7 – WhatsApp & SMS Notification System
- System 8 – Analytics & Conversion Tracking Engine
